

# Mobil Branch

Developed by

Shareppy | FINTECH  
internacional | Financial Technology

At Shareppy International we provide solutions for the financial sector.

We work so that the corporate and banking sectors can meet the needs of their customers, through tools such as Mobile Branch.

With our non-bank mobile correspondent, associates or clients can carry out operations, giving mobility to the agencies and offering services abroad through mobile devices.

The application sends information to the banking Core to carry out transactions in a secure and agile way, from the mobile device.

Mobile Branch offers great security to its users, protecting their data and financial information. It is used for financial reporting and allows the printing of support if necessary.

Use the locator of the mobile device to obtain the georeferencing of the transactions and queries made.

It has off-line functionality, so it can provide a timely, agile and secure service and optimize operations processes.

# Characteristics

Mobile Branch allows the user to check balances, make withdrawals, deposits, transfers and make transactions online.

The tool also generates a list of transactions so that the user has control and a record of his operations.

Another option offered is the printing of payment and transaction receipts, in case the user needs this information in physical format.

## Benefits and results

01. It provides mobility to financial institutions, so that they can offer their products to their users in the palm of their hands.

02.

Mobile Branch enables real-time operations to be carried out in a secure, optimal and agile manner.

03. Increase your presence in the region without the need for additional physical infrastructure.

04.

Optimizes the collection process and reduces the number of people in the branches.

05. It reduces paper consumption, as the necessary information and movement history can be viewed digitally on the user's mobile device.
